

Absen Compatible dvLED Mounting Systems

ABOUT B-TECH AV MOUNTS

B-Tech AV Mounts is an industry-leading brand of professional AV mounting solutions recognised worldwide for our reliability, robustness, ease of installation and design aesthetics. Our full range of mounting solutions covers all AV mounting requirements ranging from small, single screens to large format displays, projectors, speakers, interactive touchscreens and UC equipment, multiscreen videowalls, digital signage and, of course, our ever-growing range of award-winning dvLED mounting solutions - available as off-the-shelf kits for the most popular configurations or configured to specific requirements using our online configuration tool.

ECO-PARTNERSHIP WITH ABSEN

With an overarching aim to deliver standardised, comprehensive, and consistent deployment of solutions and support strategies to global customers, B-Tech and Absen agree to adopt a collaborative approach to their technical, sales and marketing activities, to elevate the display industry and enable customers easy access to compatible products.

As part of the partnership, B-Tech has launched a series of mounting solutions designed specifically for some of Absen's most popular product lines including all variations of A27, Clear Cobalt and the extensive Absenicon series of all-in-one displays, including the 21:9 and 32:9 ultrawide variations.

Based on our award-winning System X Range, options for wall-mounting and for freestanding, mobile and bolt-down stands are available off-the-shelf and can be seen throughout the pages of this catalogue, whilst curved or more complex projects can be quickly configured, in a matter of hours, thanks to 2-way sharing of information between B-Tech and Absen's highly skilled technical teams.

With each brand operating from multiple locations worldwide and a closely matching distribution network, customers have reassurance of the availability of suitable, easy-to-install Absen-specific mounting solutions, that can be quickly adapted should project parameters unexpectedly change.

There are also "green" benefits bought about by this partnership; thanks to B-Tech's robust stock position worldwide, Absen customers have local access to suitable mounting solutions, eliminating the need for Absen themselves to ship heavy metal mounting structures along with their display shipments. Additionally, B-Tech mounts are so easily adaptable, should project parameters change last minute, a new mounting solution will likely not need to be developed, as small changes to the parts list can allow the solution to be easily reconfigured.

If you wish to discuss your mounting requirements for Absen's range, including for configurations or cabinets not shown in this brochure, please contact us at technical@btechavmounts.com and we will be happy to support you.

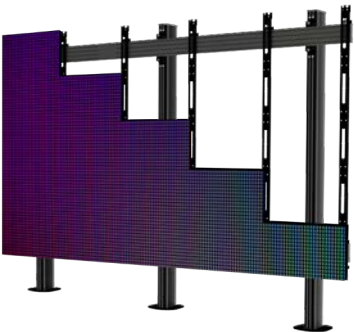

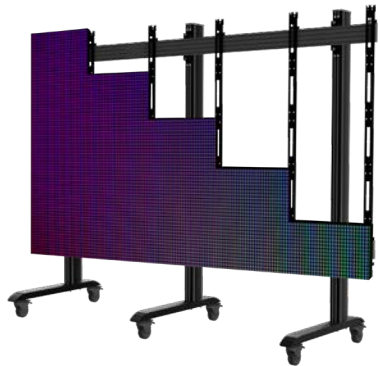

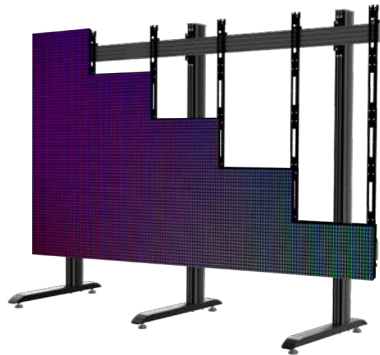

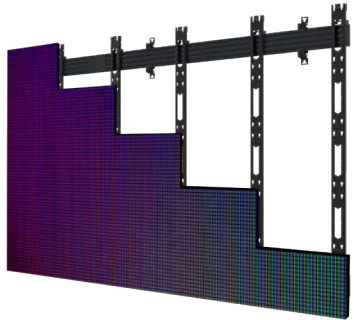

"We are thrilled to join forces with B-Tech AV Mounts and create a powerful alliance that will make Absen led displays more readily available for our customers. This collaboration will enable us to simplify the process of choosing the correct mounting or trolley solution for our customers' projects and create opportunities for growth and success."

- Absen European LED Industry Development Director, Darren Banks
