ABOUT B-TECH AV MOUNTS

B-Tech AV Mounts is an industry-leading brand of professional AV mounting solutions recognised worldwide for our reliability, robustness, ease of installation and design aesthetics. Our full range of mounting solutions covers all AV mounting requirements ranging from small, single screens to large format displays, projectors, speakers, interactive touchscreens and UC equipment, multiscreen videowalls, digital signage and, of course, our ever-growing range of Award-winning dvLED mounting solutions available as off-the-shelf kits for the most popular configurations or configured to specific requirements using our online configuration tool.

Working closely with Sony, B-Tech has developed a range of dvLED solutions designed for use with Sony's Crystal LED Series. Utilising B-Tech's renowned System X technology has allowed us to create a range using off-the-shelf components, enabling solutions to be packaged and shipped promptly, with our engineers pre-assembling all key components to save installers valuable on-site time. Solutions include wall-mounted, mobile, fixed base and freestanding options, and can be ordered in black or silver finish.

The range has been developed for the most popular dvLED configurations from 4x4 up to 8x8, but we can also provide solutions for all other configurations. Most requirements can be specified using our online dvLED configuration tool. For more bespoke and more complex installations, contact us directly at technical@btechavmounts.com and we'll be happy to configure a solution that suits your needs. In addition to our standard wall mounts and floor stands, our system can be used for more complex projects such as mounting to ceilings, curved walls, in ceiling-to-floor or ceiling-to-wall applications. Another customisation option that we can provide are cosmetic cover panels to hide the mounting structure if required.

SONY

Crystal LED
BH- and CH-series

Premium super-size images, even in bright environments

BH-series

From corporate entrances and lobbies to retail showrooms - the BH-series delivers impressively big, bright images bursting with rich vibrant colour, even in brightly-lit spaces. Harnessing latest advance in Sony's high-efficiency LED driver technology, the BH-series fills the room with an extraordinary 1,700 cd/m² of brightness. It's complimented by an anti-reflection coating on each display panel that prevents ambient light bounce-back under harsh illumination or sunlight. It all adds up to a phenomenal viewing experience that your audience won't forget.

Immersive visual experiences with more depth and colour

CH-series

Two secrets of creating truly immersive images are bright, vibrant colours and deep black levels that bring more contrast, depth and texture to faces and other on-screen objects. In addition huge black area in display by using super fine LED, the CH-series uses Sony's unique Deep Black Coating surface technology enabling our crystal LED displays to achieve outstanding black levels - superior to other high-end LED video walls. Coupled with the display's extra wide colour gamut, audiences will love being pulled into richly immersive images.
