B-Tech's new BT8312 pop-out mount brings ultra-slim benefits

B-Tech AV Mounts have added to their range of pop-out mounting solutions with the introduction of the ultra-slim BT8312.

Designed to make video wall installations as quick and simple as possible, B-Tech's latest mount can be used to create unlimited video wall configurations in both landscape and portrait format.

The ultra-slim profile of the BT8312 makes it the ideal choice for mounting into walls with a narrow recess or when space in front of the wall is at a premium. ADA compliance - American legislation relating to the accessibility of electronic and information technology for people with disabilities, states that wall mounted screens in public places must not protrude more than 100mm from the wall. As screens get thinner, with some sub-50mm deep models now available, the BT8312 is ideal for meeting regulations like this.

Being part of the B-Tech family of mounting solutions, the BT8312 also works perfectly as a pole mounted solution when used with the System 2 range.

Similar to B-Tech's ever-popular BT8310 mount, the BT8312's pop-out system allows quick and easy access to the rear of mounted screens for servicing and tool-less micro-adjustment enables easy and accurate screen alignment.

With ease and speed of install playing an important role in the success of a product, the BT8312 features wallplate keyhole fixing and mounting template spacers are also available to eliminate tedious calculations and on-site measuring.

B-Tech business development manager Mark Walker said: "Our BT8310 solution has been a huge success story for B-Tech, used to support thousands of displays around the globe. With the introduction of the BT8312, integrators get all the pop-out convenience of the BT8310, but with an ultra-slim profile that allows installations to be fitted even closer to the wall.

B-Tech's engineers have developed an integrated locking mechanism that prevents accidental screen pop-out, with interface adaptor arms included for use with VESA 600 x 400 displays.

Available for shipping now, you can see more about the benefits of B-Tech's BT8312 here [*youtube link*](#) or contact your B-Tech representative.

Key features

- Ultra-slim design ideal for low-profile installs
- Modular design allows for unlimited video wall configurations
- Suitable for both landscape and portrait applications
- Pop-out system offers quick and easy access for servicing, even in recessed applications
- Tool-less micro adjustment at each corner for seamless screen alignment
