New B-Tech rotational flip mount has all angles covered

Multi-award winning AV mounts manufacturer B-Tech AV Mounts has launched a rotating screen mount that can flip between portrait and landscape orientation, as well as any angle in between. Named the BT7550, this new rotational flip mount has been designed to easily rotate with a simple locking point, making the 'switch' a fast and simple process.

The tool-less rotation adjustment allows users to freely rotate screens from 0-90° while mounted, or locked at a preferred angle using the built-in angle guide before installation. Additional features include optional negative tilt of 4.5°, ideal for touchscreen displays such as the Samsung Flip.

The BT7550 can be easily mounted to a wall or attached to other B-Tech products such as wall mounts, accessory collars (for pole mounting) and B-Tech's renowned System X rail mounting system.

Nick Spencer, Director of Marketing and Communications for B-Tech, said: "Users will love the ease in which they can change their screen orientation. For a boardroom or classroom presentations, users can switch from a portrait display to landscape - for videos for example - with ease. The ability to simply pre-set angles also allows for perfect creative displays, where numerous screens can be mounted at the exact same off-set angle."

The BT7550 is available now from stock. For more details, please speak to your B-Tech representative.
