Single out the right mount with B-Tech's latest online tool

B-Tech AV Mounts have made specification of screen install kit even easier with the release of a new online Mount Finder.

Complimenting their popular online configurator for videowalls, B-Tech's latest tool allows customers to quickly find a solution for any single screen mounting requirement.

This latest online tool will quickly identify a suitable fixed, tilt, full motion, mobile and ceiling mounted option - requiring users to input just 4 pieces of information about the screen they wish to mount; size, VESA pattern, weight and desired orientation.

B-Tech Marketing Manager Nick Spencer explains: "The purpose of this tool is to make it quick and easy for customers to narrow down the most suitable options for the screen they wish to mount. Our complete mounting range is rather extensive, so we see our Mount Finder being particularly beneficial to new customers who may be less familiar with the full B-Tech range."

He adds: "Similarly to our popular System X Configurator, we've set this up so that customers can easily embed it into their own websites as a 'widget' - something that we expect to be popular and useful for our distributor and reseller partners."

The Mount Finder can be reached via a new button in the header of the B-Tech website, meaning it can be accessed quickly from the homepage, as well as from anywhere else on the site. This button also provides quick links to B-Tech's other popular configuration tools; for System X and the BT8350 modular range.
